REASONS FOR ALLOWANCE

Information Disclosure Statement

1. The information disclosure statement filed 03/26/2004 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.
2. Claims 1-10, 12-23 and 25-36 are allowed.
3. Claim 1 is a method claim, which contains limitation "temporal" document. In the Specification, Applicant describes that "temporal" document is dynamic or changing and relates to temporal material such as video programming (paragraphs [0003] and [0008]). Applicant further discloses that temporal documents are multimedia material such as video and audio programming or may reflect an event that is occurring "live" at the time the temporal document is transmitted over the Internet (paragraphs [0008] and [0009]). Thus claim 1 inherently involves the use of a particular machine which performs steps recited in claim 1. Therefore, the recited method is tied to a particular machine or apparatus. Accordingly, the recited method is statutory subject matter.

4. The following is a statement of reasons for the indication of allowable subject matter:

In interpreting the claims in light of the specification and applicant's arguments, the Examiner finds the claimed invention is patentably distinct from the prior art of record.

The prior art of record includes Applicant's admitted of prior art shown in Specification, paragraphs [0010]-[0011], Abecassis, US Patent No. 6,504,990, Barr et al. (Barr), US Patent No. 5,873,067, Goldberg et al. (Goldberg), US Patent No. 5,963,203 and Liddy et al. (Liddy), US Patent No. 5,963,940.

Applicant's admitted of prior art shown in Specification, paragraphs [0010]-[0011] teaches a user indicates interest during a particular segment (at a particular time) of the video material (temporal document), and upon an expression of interest, the related web page or document of the particular segment may be presented to the user. Applicant's admitted of prior art further teaches the particular portion of the video is reached or chosen, the related web page or document may be presented to the user and the user may be informed of the availability of a link to related material and offered the choice of accessing it. Applicant also admitted that the prior art discloses a user indicates interest at a particular segment of the video material by clicking with a mouse or pressing a button, and one of ordinary skill in the art would have acknowledged that the indicated video segment would include a time interval which is a beginning time and an end time of the indicated video segment.

Abecassis discloses a method of, and a system capable of, playing at least a portion of at least one video segment of a video and enabling a user to define for a fragmented playing (Abstract). Abecassis further discloses a user defines a video segment for playing, wherein the defining may be directly identifying a beginning and ending points (time) or indirectly identifying at least one of a plurality of video segments (Abstract).

Barr discloses a searching/retrieval system which can query a library or database and identify not only text documents, but also multi-media files stored on the library or database that are relevant to query (col. 2, line 59 – col. 3, line 54). Barr further discloses accepting a query and returning a single search results list having both text and multi-media information (temporal document), and query server performs a relevance ranking on each of the textual documents and multi-media files identified by the search by generating a relevance score corresponding to each of the entries on the search result list, and this relevance is based on the term location information contained in index database, and in part of the relative proximity within the document file of terms forming the search query (col. 12, lines 54-65, col. 13, lines 30-67, and col. 24, lines 19-26).

Goldberg discloses user may express an interest in a particular region of a video sequence by designating a portion of a displayed video using a pointing device, i.e., clicking with the mouse button on the frames of interest as displayed in the interactive video icon (col. 6, lines 34-43 and col. 7, lines 4-19).

Liddy discloses the scores are an indication of the strength of the association between the term and the document, and for each document the document Term Frequency (TF) is calculated, the product of TF and the Inverse Document Frequency (IDF) is used as the basis for the posting score - a measure of the relative prominence of a term compared to its occurrence throughout the corpora, and TF.IDF scores a cataloged for a varying number of logical paragraphs in a given document (col. 16, lines 1-23). One of ordinary skill in the art would have acknowledged that the term score (term frequency) of a term proportional to an inverted document frequency of the term from the formula $TF \cdot IDF$, and where TF is the numbers of occurrences of a term within a given document (col. 22, lines 12-25). Liddy further discloses that different sources of evidence are used to compute individual measures of scores between the query and a given document and the individual scores are combined or summed to form a single relevance score (col. 22, line 1 - col. 23, line 50).

Claim 1 is allowed because the prior art of record does not explicitly disclose alone or in combination "in response to a signal of interest at a particular time during the temporal document, identifying a temporal range of the temporal document for which related documents are to be found, wherein the related documents are selected from a collection of document according to scores associated with the documents, said scores for each document based on a summation of term scores for at least a subset of the terms of the selected text, the term score of a term is weighted according to a temporal position of the term within the temporal range."

5. The dependent claims 2-10, 12-13, 27-29, 30 and 35 further limit claim 1. Claims 14-23, 25-26, 31-34 and 36 are allowed for the same reasons set forth for claims 1-10, 12-13, 27-29, 30 and 35.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
